* Pricing/case is FOB Collect: Customer pays shipping from Leominster, MA 01453. We require 3-week lead time for all ongoing orders.

Preserve is the best single-use option for the environmentally-conscious food service provider.

Made from 100% Post-Consumer Recycled #5 Plastic: Polypropylene (#5 plastic) is the most common plastic found in the U.S. waste stream today, but its recycling rate is a mere 2%. Preserve® aims to increase recycling rates by working with retailers and consumers to collect #5 plastic and then helping reprocessors and manufacturers to turn that plastic into products, all within the U.S.A.

Responsible End of Life Solution: As a more sustainable alternative to compostable or throw-away cutlery, Preserve® cutlery is made from 100% recycled plastic and is recyclable through the Preserve® Gimme 5™ recycling program or commercial waste streams that accept #5 plastic.

Ask your representative about whether the Preserve® Gimme 5™ recycling program is right for your organization.
